

We've spent hundreds of hours finding, analyzing, and saving winning native ads across different niches, character types, and awareness levels.

They're all here: <https://app.foreplay.co/share/boards/kmgypjhabnyltWhZDZ4>

This board is constantly updated. As we find new winning ads, we add them, so far we have covered 5+ niches and added 200+ native images. (check the copy as well with each image, it's gold mine if you know how to use them with AI)
