

Is Your Washing Machine Making You Sick?

Written By: **HALEY WILLIAMS** on 3/27/2026

Don't judge me, okay?

But I have to be honest... I'm a 39 year old woman, and I do laundry at my mom's house.

I know some people could say that I'm too old to rely on my mother to get my laundry done, but I am a single mother, and I need every bit of help I can get.

Plus, when I do laundry over there, it's a great excuse to spend time with her, which she likes, too.

But something strange started happening. My laundry started smelling worse and worse, like rot and mildew.

And every time I washed them, they smelled worse!

I asked my mom if she knew what was going on, but she just shrugged.

"It's a new machine, I don't know what to tell you," she said.

I decided I had to take it into my own hands, so the next time I went over there, I had a plan.

I ran the machine with just bleach, thinking that it could clean the machine and kill the smell.

But nope. It smelled worse somehow!

I asked my mom again to do something. I told her that my kids are stinking up the place at school, and that I don't want them to get bullied.

"Can't you hire a plumber or something to figure it out?" I asked.

But she just shrugged, "Why don't you just do your laundry at the laundromat if you want to make such a stink about it."

But going to a laundromat? Not a chance. I was going to have to find a solution on my own.

Then I had a lightbulb moment: I WOULD go to the laundromat. But just for information- I would ask the workers how they clean their machines. If I cleaned my mom's machine like they did, the stinky smell would be eliminated!

When I walked in, I saw a man with coveralls and a name patch, Louis.

I pretended like I wanted to do laundry there, then I asked him how he kept his machines clean.

"Easy! We use **Splash Spotless** washing machine tablets," he said.

"The dissolve throughout an entire hot cycle, slowly disintegrating,"

"They professionally scrub every nook and cranny of the machine

"It foams up, so the soap can get to the bottom of the residue, washing it away

"Leaving our machines clean and smelling so fresh!"

I was impressed! These **Splash Spotless** tablets sounded great. I asked him if he used

Customer Reviews

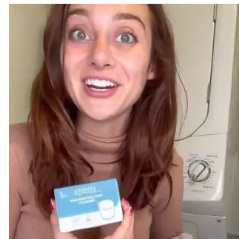

I would give ten stars if I could! This stuff works really well. My washer doesn't smell moldy, mildewy and gross anymore. Try this if your washer stinks! You won't regret it.

Kealanie

Easy to use and did clean my washer as advertised.

Marie

Works great! Just like they said.

Betina VB

It's just what I needed. It cleaned my tub real good.

Alan Brown

This product is great. took the smell out of our washer. We have found of that using this on a regular bases will be good for your house.

Clifford Sexton

anything else, or just Splash Spotless.

"Nope, just Splash Spotless!" he told me, "We tried other cleaning solutions, but [Splash Spotless](#) is the cheapest, plus it works the best using surfactant chemistry to eliminate the root cause of stinky machines."

I hadn't even thought of the root cause! I asked him why machines start stinking.

"Bacteria, ma'am" Mario looked freaked out, "Or as I like to call it—"washateria." They love a damp, humid, dark place, so washing machines are the perfect place for them to set up shop. We even saw on the news a few months ago about a customer getting sick from a bacteria-filled laundromat."

"But that would never happen here, since we use Splash Spotless every 30 washes," he said, proudly.

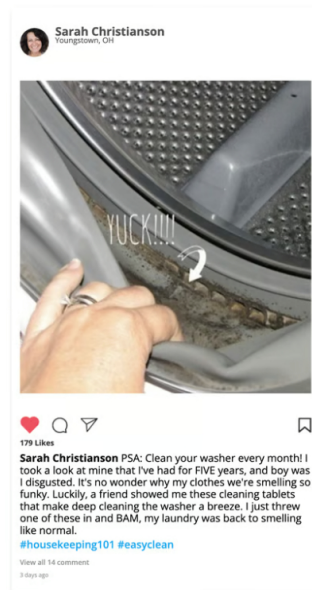

"Great!" I said, and started out the door.

"Where are you going!?" he said, "Are you going to grab your laundry?"

I laughed, "Nope, sorry!"

When I got home I looked up Splash Spotless online to check the reviews. I wanted to double check they worked before I spent my money.

And holy reviews, Batman! [Splash Spotless](#) had 12,936 5 star reviews!

I hadn't ever heard of Splash Spotless before, so I decided to do a little research of my own before I went out and got one.

What is it?

[Splash Spotless](#) tablets are easy-to-use washing machine cleaners that are safer and more effective than bleach. They keep your washing machine and clothes fresh for a

whole month!

Splash Spotless tablets work by deep cleaning your machine so that it stays clean for a month.

Check out this short video to see how Splash Spotless works to clean your washing machine:

Healthy, Happy, Family

Health begins and ends with cleanliness. That's why hospitals are so concerned with being sterile. [Splash Spotless](#) tablets keep your washing machine clean, which is a key step.

Clean, Fresh Clothes

Is there anything worse than smelling bad? It is so embarrassing. Splash Spotless tablets guarantee that your clothes will smell great!

Mold Preventative

Mold is a dangerous and sneaky health hazard. It makes millions of Canadians sick every year. Splash Spotless tablets prevent mold from one of its sneakiest home bases.

Fresh Linens Throughout The House

Your whole house is affected by the way your washing machine works. How can a house truly feel clean if the pillowcases smell like mildew, even just a little bit. There will be no more mildew scent with these amazing tablets.

Extend washing machine life

It is well known that if you take care of your things, they will last longer. [Splash Spotless](#) Tablets will keep your washing machine clean and running smoothly for many years to come.

How Does it Work?

[Splash Spotless](#) is easy to use every month!

The truth is, not everyone can afford a new washing machine or expensive repairs. That's why Splash Spotless works by simply dropping a tablet into your machine and pressing a button to start a cycle.

While the machine runs, the tablet uses surfactant technology to slowly dissolve over the course of the cycle, sending powerful scrubbing enzymes into every nook and cranny.

Then, Canadians can enjoy life while Splash Spotless keeps your washing machine and home happy and healthy. No scrubbing needed!

Is It Worth It?

Short answer—yes!

Check out the ways that [Splash Spotless](#) saves you money:

Splash Spotless v. A New Washing Machine

Affordable v. Expensive

Easy v. complicated installation

Do it yourself v. hire an expensive contractor

Save the planet v. wasteful new item

Guaranteed clean v. can have same problem!

Just check out what these verified Splash Spotless customers have to say:

No More Grime

"I didn't realize it, but there was a ton of grime building up in my washing machine. I found out the hard way—one of my little girls told me the other kids were making fun of her for being stinky. I was horrified! We always took good care of ourselves. When I realized the source of the stench was the washing machine, I thought we were going to have to get a new one. Luckily, our plumber is super honest and suggested Splash Spotless first. The results after just one tablet were incredible! Now, it is a part of my monthly routine."

Grandma Stinks

"My grandma has been struggling, ever since my grandpa passed. The whole family pitches in to help, but people spend less time over there because it smelled so bad. I deep cleaned her house, and discovered that her washing machine smelled like rotten eggs. I tried scrubbing it with everything—bleach, apple cider vinegar, baking soda, comet, nothing worked. Then I saw an ad for Splash Spotless, and figured it was worth a shot, since there was a money-back guarantee. I'm so glad I did!! It works so well, and her house is totally fresh again!"

Mold Allergy

"As someone with a lifelong mold allergy, I am always on the lookout for ways to get every single spore out of my life. I used to scrub my washing machine every week, killing my knees and triggering my allergies. Not anymore! Splash Spotless has eliminated the scrubbing and struggles—just pop it in and let it do all the work. It's eliminated the mold that hid from me, and my whole house feels fresher."

Those testimonials were incredible! But I wanted to get an expert's opinion, too. Here's what Robert Jones, a doctor of toxicology, had to say:

"The best way to take care of your washing machine is Splash Spotless, hands down. Did you know it works for your dishwasher, too? This is the kind of product I recommend to all my patients because it boosts your external immune system—"

when your home environment is clean and free of mold, bacteria, and germs, you are MUCH less prone to infections and illnesses. What makes Splash Spotless unique is its safe, natural, but powerful scrubbing enzymes, that really get into every nook and cranny of your machines, rooting out the “washateria” that can make your family sick. I highly recommend everyone protect themselves with Splash Spotless!”

After reading the testimonials, and seeing what the doctor of toxicology had to say, I was starting to believe that Splash Spotless was right for me.

And when I saw that there was a money-back guarantee, I knew I had nothing to lose, and everything to gain.

I ordered a [Splash Spotless](#) right away. I wasn’t going to take any chances!

But when I clicked on the checkout, they said they were out of stock!

At this point, though, I was determined. So I checked back every day until I could place my order.

I breathed a big sigh of relief as I pressed the checkout button. Splash Spotless was on its way.

When it arrived, I was impressed with how small it was—could something so small really be that powerful??

When it came, I raced over to my mom’s house and dropped one in her machine, and started the hot cycle.

And when the cycle was over...

The machine smelled so fresh! And looked so clean! The way a washing machine should be.

I did a load of my laundry and when it was done, it still smelled amazing!

[Splash Spotless](#) had scrubbed every inch inside of the washing machine, removing any “washateria” was gone—all the built up grime of mold, germs or bacteria had been erased by Splash Spotless.

Even my mom was impressed after she did a load of laundry herself.

But she said she wasn’t going to be that excited unless the machine was still clean a week later.

It was!

Even a month later, the smell was gone, but I used another Splash Spotless just in case. It says on the box to use once a month for best results—too easy!

After I realized how amazing Splash Spotless is, I’ve been buying them for family and friends as an easy present—and they love it, too!

I am THRILLED with [Splash Spotless](#). It rescued me from having a stinky family—or having to go to the laundromat.

Splash Spotless is currently offering a 50% off discount in recognition of World Health month, so don’t wait. I ordered a 2 years supply (which actually didn’t cost very much at all!)

UPDATE
